

Mini Meadows is making some important strides in organizing our thoughts and collective energy. We have set up a google group as well as a shared google drive to collect our thoughts, ideas, opinions, and so forth. **If you'd like to be a part of the project and added to the google group, please email Kevin Race ([kevin.race19@gmail.com](mailto:kevin.race19@gmail.com)) or Kanischa Miller ([kanischamiller@gmail.com](mailto:kanischamiller@gmail.com)) and we will add you accordingly.** In March we conducted our first Group Survey, see some of the results below:

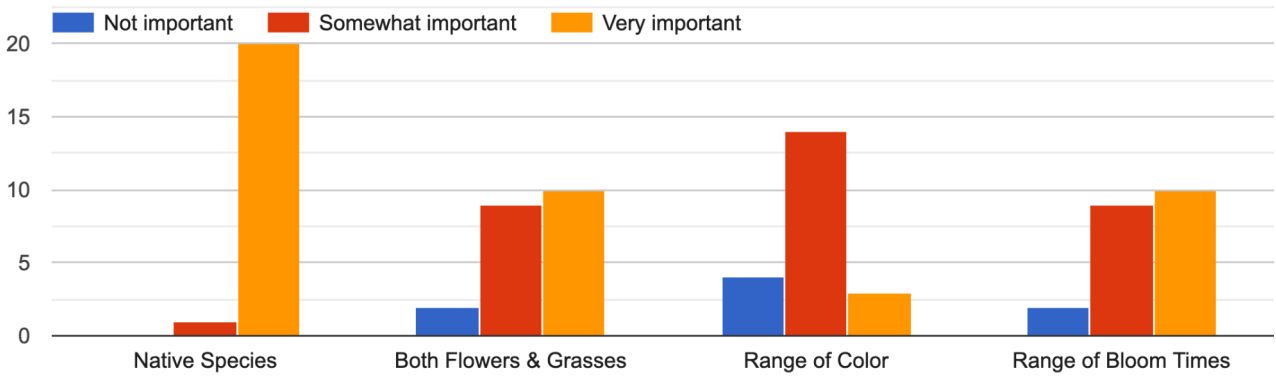

First, Site Selection. Remember the grant criteria; publicly-owned sites with existing (or easily achievable) support from adjacent residents/business...ht for this grant we can target it at a later time!  
21 responses

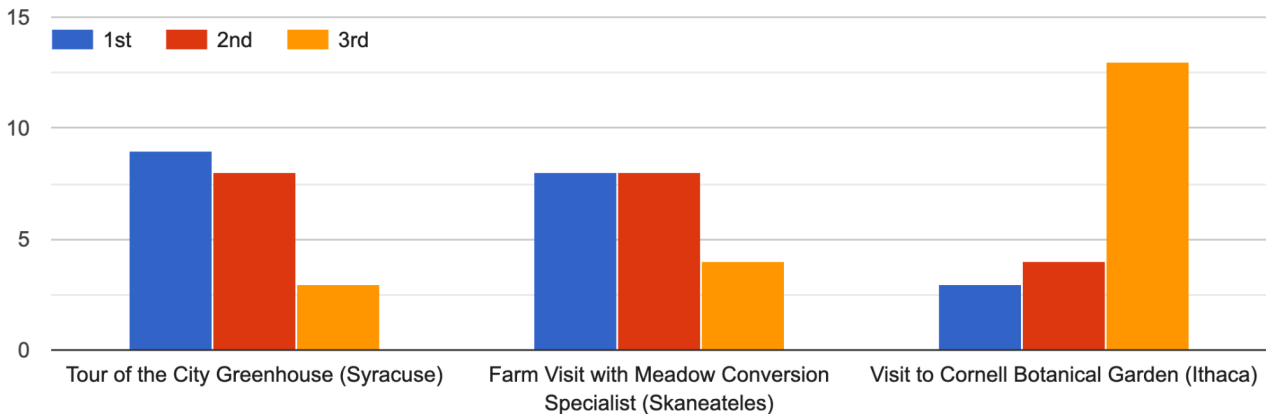

Second, Planting Style/Design. Once we select our site(s), we can finalize design together via a site visit. The amount of land we can plant will depe...e do you prefer? Any other comments/suggestions?  
21 responses

Seed Mix: What is important to you when considering the mix of species in our plantings?

Lastly, Field Trip! Let's do something fun when the weather fully breaks. How would you rank these three trip ideas?

**To Recap:** We are moving ahead with the Loguen Park location as it pertains to the Greening Grant offered by the Syracuse Parks Conservancy. We will also keep working on the 901 Park St location, but for now the priority is Loguen Park on the Eastside. Next steps for the group is to finalize the application, schedule a site visit so we can plan the installations and take measurements, and canvass the local residents and businesses to gather support, feedback, and excitement.
